**ROCKWATER**  
PROFESSIONAL PRODUCTS

Rockwater Professional Products is a Newfoundland owned and operated company based in Mount Pearl, NL. We have an extensive line-up of food-grade and environmentally friendly cleaners, sanitizers, and disinfectants that have a proven track record of effectiveness and success by our customers. In addition to many food and beverage facilities, we provide products for beer and wine makers around the island. It is our promise that we will work diligently to ensure that your products will always work for you. We will work side by side with you to help improve and/or develop your Standard Operating Procedures. We can help you establish your monitoring techniques. We will make recommendations on the right cleaners and cleaning equipment for your facility to help you maintain a consistently high-quality sanitation program. We can provide training in Basic Sanitation Principles & Procedures and Chemical Use & Awareness.

Our Chemical Program consists of:

- Alkaline cleaners – target organic/biological soil
- Acidic cleaners – target mineral and scale type Inorganic soil. We carry both organic and inorganic form acidic cleaners in foaming or non-foaming format
- Powdered brewery and distillery cleaners – designed specifically for CIP systems
- Disinfectants and sanitizers including disinfectants with cleaning properties that tackle biofilms, and “combination killers” which are disinfectants with more than one active disinfecting ingredient
- Sodium hypochlorite – designed for all types of chlorination and sanitization. In liquid or powder format
- Biological enzymatic cleaners – treat and deodorize drains and grease traps, which can also be used as safe, non-corrosive, and environmentally friendly cleaners to remove biological soils.
- Dishwashing (automatic and manual) detergents and rinsing additives
- All the custodial cleaners, tools and supplies you may need

PROFESSIONAL PRODUCTS

## ALKA-CAM

### Non-foaming Alkaline Cleaner for CIP, KEGS & BOTTLES

- Engineered for mills, mashers, lauturers, boilers, coolers, fermenters, conditioners, filters, and packaging
- At use dilution, non-harsh and safe on hard surfaces
- Chlorine-free
- Odourless, non-fuming
- Concentrated
- CFIA approved
- Apply at 1.00%; circulate prepared solution inside the closed loop, achieving 10 to 30 minutes contact time depending on the type of soil; rinse with abundant potable water

**205 L / 20 L / 4 L**

## **FORMUL-A-CID**

### **Non-foaming De-scaler for CIP, KEGS, & BOTTLES Stainless Steel Passivator**

- **2 in 1 phosphoric and nitric acid solution**
- **Cleans scale, calcium, and rust deposits**
- **4 times more effective than phosphoric acid alone**
- **At use dilution, safe on hard surfaces**
- **Ideal for stainless steel passivation**
- **CFIA approved**
- **Apply from 0.50 - 1.00%; circulate prepared solution inside the closed loop achieving 10 to 30 minutes contact time depending on the type of deposits; rinse with abundant potable water**

**205 L / 20 L**

# BIOXY PLUS

## Powdered Peracetic Acid Sanitizer and Cleaner

- Powdered PAA sanitizer and cleaner
- Yields peracetic acid and hydrogen peroxide in water
- Active in the presence of both organic and inorganic soil
- Effective at breaking biofilm
- Broad spectrum
- Works at near-neutral pH
- Non-corrosive and non-harsh
- Safe to handle, low odour profile, and environmentally friendly
- CFIA approved

**20 kg / 4 kg / 1 kg**

# STEROKLOR

## Non-foaming Powdered Sodium Hypochlorite Cleaner for CIP, FITTINGS, KEGS, & BOTTLES

- **Powdered sodium hypochlorite (available chlorine 3.2%)**
- **Cleans and sanitizes surfaces and equipment either manually or in closed (CIP) systems**
- **Ideal for cleaning stainless steel parts, fittings, and rubber gaskets**
- **Non-corrosive to stainless steel, plastic, and glass (avoid prolonged contact with aluminum)**
- **Cost effective with longer shelf life compared to chlorinated liquids**
- **Cleans and de-stains dishes, coffee urns, and teapots**
- **Excellent solubility in water**
- **CFIA approved**
- **Use at 0.6 to 2% (6 to 20g/L); circulate prepared solution inside the closed loop achieving 10 minutes contact time; rinse with abundant potable water**

**3 kg**

## SOLID

# Low-Foaming Alkaline Powdered Cleaner for CIP, KEGS, & BOTTLES

- Powdered alkaline cleaner
- Formulated specifically for breweries
- Caustic-free
- CFIA approved
- Use at 1 to 5% (10 to 50g/L); circulate prepared solution inside the closed loop achieving 10 to 30 minutes contact time depending on the type of deposit; rinse with abundant potable water

**20 kg / 4 kg / 1 kg**

## **SAFE ACID**

### **Foaming or Non-foaming Organic Acidic De-scaler for CIP, KEGS, & BOTTLES**

- **Phosphate-free, biodegradable**
- **Safer to handle than other acidic cleaners**
- **Non-fuming, no VOC's or bleaching agents, non-corrosive to skin**
- **Approved for use in Green Seal and EcoLogo products**
- **Excellent beerstone remover**
- **CFIA approved**
- **Use in CIP at 0.5% to 5%. For manual cleaning, use at 5%**

**205 L / 20 L / 4 L**
